## Minimum System Requirements

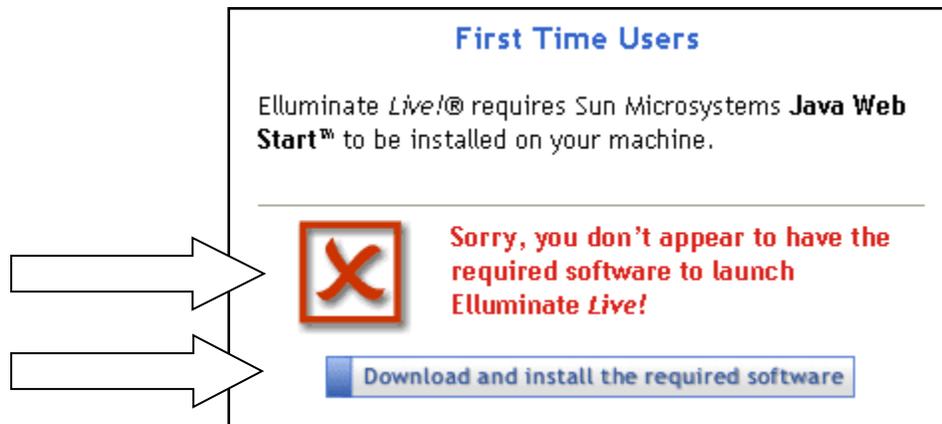

<b>Windows Client</b> <ul style="list-style-type: none"><li>• Windows XP (32 bit) or Vista (32 or 64 bit)</li><li>• Pentium III 1 GHz processor</li><li>• 256 MB RAM</li></ul>	<b>Java Desktop System (Linux) Client</b> <ul style="list-style-type: none"><li>• OpenSUSE 11 (64 bit) or Ubuntu 8.10 (64 bit)</li><li>• Pentium III 1 GHz</li><li>• 256 MB RAM</li></ul>
<b>Mac Client</b> <ul style="list-style-type: none"><li>• Mac OS X 10.5</li><li>• G4, G5 or Intel Processor</li><li>• 256 MB RAM</li></ul>	<b>Solaris Client</b> <ul style="list-style-type: none"><li>• Solaris Sparc 10</li><li>• UltraSPARC IIc 500 MHz</li><li>• 256 MB RAM</li></ul>

### All computers also require:

- 20 MB free disk space
- Soundcard with speakers and microphone or headset
- 28.8 Kbps Internet connection (dial-up) or higher
- Java version 1.5 or higher
- Latest browser software version (for example: Internet Explorer 7)

If you do not have **Java Web Start** installed on your computer or if you are unsure, visit the [Elluminate Support](#) page, which will indicate whether or not your computer has the necessary software to run an Elluminate session. If your computer fails the test, you will need to download/install Java Web Start by clicking the “Download and install the required software” button. This will take you through a set-up wizard.

## Preparing for a Session

- Along with meeting the computer requirements stated above, you will also need a headset microphone to participate in Elluminate sessions. Please **avoid using standalone microphones or speakers** as they can cause audio feedback and/or echoes. Visit BestBuy, Target, Walmart, or any other electronics vendor to find a headset microphone that meets your needs. Prices can range anywhere from \$15 to higher.
- Make sure to orient yourself to any mute buttons or on/off features your headset microphone may have.
- To test your computer's ability to access an actual Elluminate session, please visit the [Elluminate Configuration Room](#) prior to your first course-related meeting. Accessing the Configuration Room will assure your computer's connectivity to Elluminate sessions. Once inside the Configuration Room, you can also test your microphone and speakers.
- Prior to your first session, please view the [Elluminate Participant Orientation Video](#). For additional videos or materials, see the [Elluminate Training](#) page.

## Logging into a Session

- Be sure to join the session 5 – 10 minutes prior to the start.
- If you will be joining the session from a **dial-up connection**, you will want to factor in that it will likely take up to 40 minutes or more to download the required Java environment. Once again, you can visit the [Elluminate Configuration Room](#) any time before your session to get your computer ready. After completing the configuration one time, you will be able to use your dial-up connection to access any Elluminate session in a matter of seconds.
- To join an Elluminate session, you will click a hyperlink provided to you. These links will be posted in your Sakai course or sent to you via email.
- Once you click on an Elluminate link, you will be taken to a login screen. (See picture.)

## Session Login

Please enter your Name for the session.  
(Note: The Name may not exceed 64 characters)

Name:

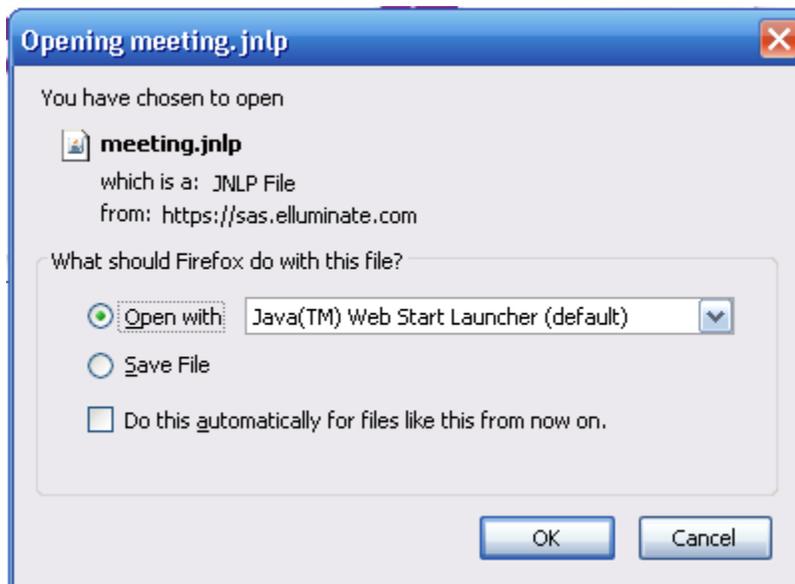

Log in

Finally, click the **Log In** button to enter your session.

Unless otherwise instructed by your professor, participants will not have an official login name for online sessions. **Please type in your full name** instead, so that the session moderator will not mistake you for another student.

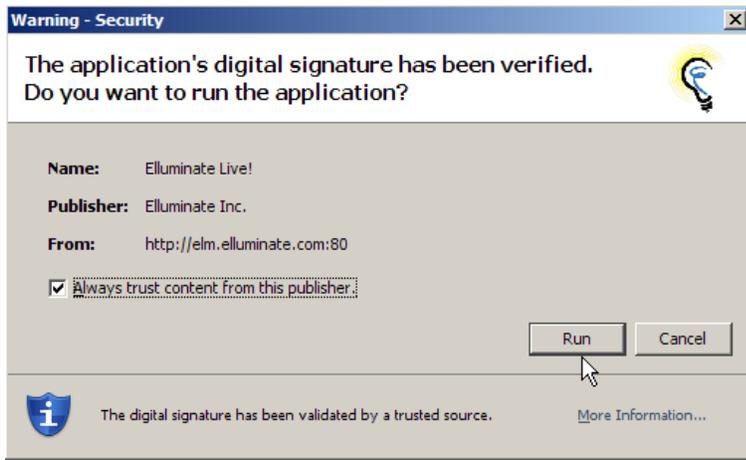

## Participating in Your Session

- After you have clicked the “Log In” button, you should see the following window:

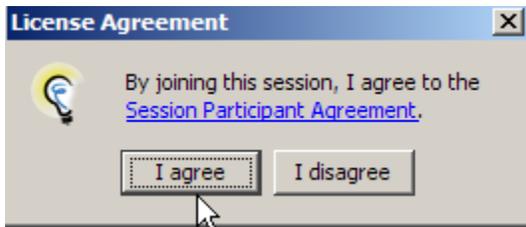

Click “OK” to continue as shown above.

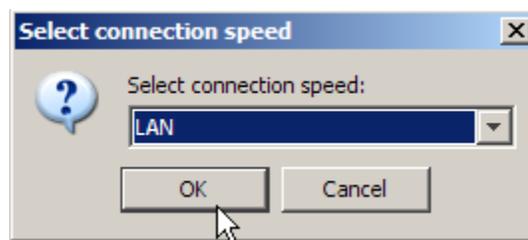

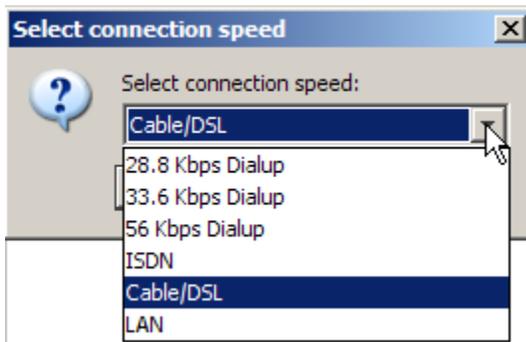

You may also see the following windows where you will need to select as shown.

- You will then need to select "I agree" within the License Agreement pop up message as shown:

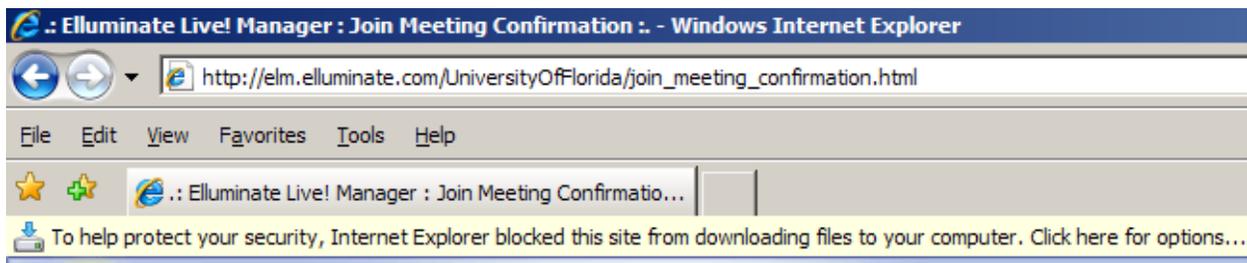

- When prompted to do so, set your connection speed to the Internet.

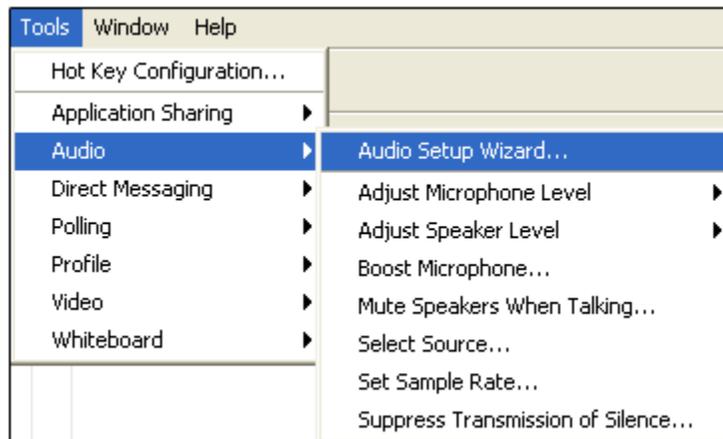

If you are using Internet Explorer:

You may see the following messages and will need to select as necessary to allow.

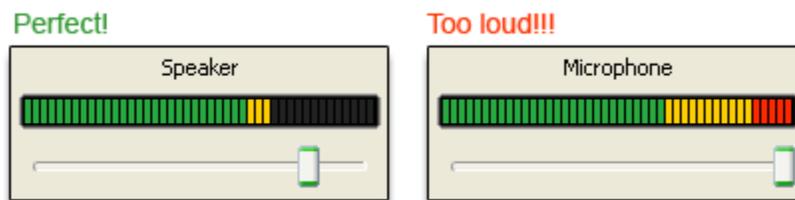

See below:

Finally, once you are in the session, use the **Audio Setup Wizard** to test your microphone and headset speakers as shown below.

Be sure to set your audio levels for your microphone and headset speakers so that they only enter into the "green/yellow zone." If your audio levels bleed into the "red zone" your audio will be distorted.

- Remember to raise your hand when you have a question or a comment and use the emoticons to express emotion.

- When invited to talk, click on the **microphone button** or press Ctrl + F2 on your keyboard. When you are finished talking, be sure to click the microphone icon again to release the microphone back to the group. In most sessions, **only one person will be able to use the microphone at a time**. You can also adjust the microphone and speaker volume by dragging the appropriate volume indicators.

- Participate in the session by responding to polls and providing feedback to the moderator.

Yes/No Polling

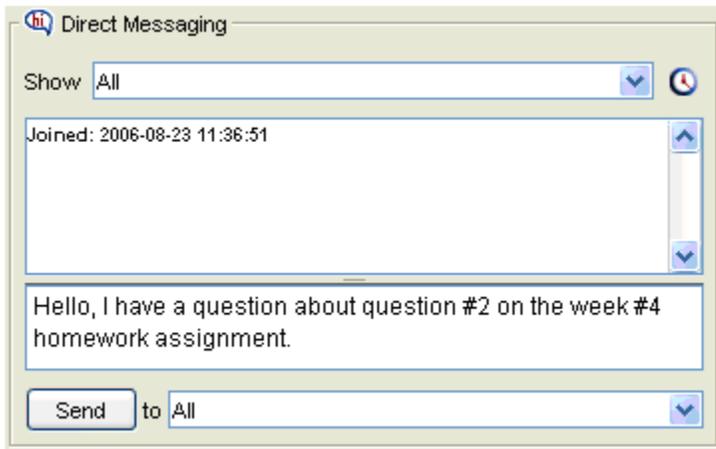

Multiple Choice Polling

Class Pace Polling

#### CHAT:

- Use Direct Messaging to send messages to other participants and the moderator during the session.

- Remember that running other applications on your computer (such as an Internet browser) can slow your connection to Elluminate Live!

## Technical Support

If you should experience any technical difficulties while using Elluminate, please contact:

Elluminate Tech Support (available 24/7)  
[www.elluminate.com/support](http://www.elluminate.com/support)  
 Toll-free: 1-866-388-8674 option 2.  
 International users can dial 703-956-3812.
